

THE ADVISOR

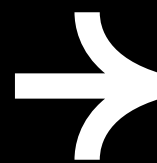

# MEET “THE ADVISOR”

The Advisor delivers fast (and **slightly sarcastic**) advice for your daily life — with a sleek design and zero friction.

# 01 WHAT IS “THE ADVISOR”?

Is your digital companion for getting through the day — with the most **wonderfully useless**, questionably helpful advice ever written.

Sarcastic? A little.

Helpful? Debatable.

Fun? Absolutely.

## HOW IT'S BUILT

Crafted with **Flutter**, using:

- A custom-designed UI with thoughtful animations
- **AI integration** to generate personalized (and slightly ironic) advice
- No tracking, no login required
- Lightweight and smooth performance

Designed to deliver quick advice with a touch of personality.

## WHY I MADE IT

This app started as a fun challenge to mix creativity with code — and turned into a real project.

I wanted to explore **AI, UI design**, and product flow — all while keeping things lighthearted and user-friendly.

## WHAT I LEARNED

This project helped me level up in:

- UI architecture and animation in Flutter
- Managing user state and custom forms
- Integrate with AI
- Improving my UX thinking for casual apps
